Zoom Talk: Topiary: a history of creative use.

Bruce Ginsberg is a founding member of the European Boxwood and Topiary Society in the 90's and was its chairman for a number of years. Bruce's fascinating talk will cover the history of the use and cultivation of topiary, ranging from East and West, from Roman times onwards, to contemporary topiary use. Bruce says: "I am intrigued by how we separate and structure a piece of space and do something to it, to hold the eye and open the heart. Topiary helps structure the space and focuses us on both the small and intimate, and the boundless endless patterning in all directions".
